Contents Volume 134

1 Recent trends in modeling of deteriorating inventory
S.K. Goyal and B.C. Giri

17 Simulation output analysis using the threshold bootstrap
D.S. Park, Y.B. Kim, K.I. Shin and T.R. Willemain

29 Some two-echelon style-goods inventory models with asymmetric market information
A.H.-L. Lau and H.-S. Lau

43 Measuring economic efficiency with incomplete price information: With an application to European commercial banks
T. Kuosmanen and T. Post

59 Optimal preventive-maintenance warranty policy for repairable products
R.H. Yeh and H.-C. Lo

70 Perceptions of contribution in multi-cultural groups in non-GDSS and GDSS environments
B.F. Daily and J.E. Teich

84 Using investment portfolio return to combine forecasts: A multiobjective approach
M.T. Leung, H. Daouk and A.-S. Chen

103 Performance of simulated annealing-based heuristic for the unconstrained binary quadratic programming problem
K. Katayama and H. Narihisa

120 Inventory models with minimal service level constraints
F.Y. Chen and D. Krass

141 Bootstrap re-sampling for unbalanced data in supervised learning
G. Dupret and M. Koda

157 Goal programs with $-n_i$, $-p_i$ and $-(n_i + p_i)$ objective functions
Z.Y. Zhang and J.S. Shang

165 A genetic algorithm approach to the product line design problem using the seller's return criterion: An extensive comparative computational study
G. Alexouda and K. Paparrizos

179 An integrated decision aid system for Bosphorus water-crossing problem
F. Ülengin, Y.İ. Topcu and Ş.Ö. Şahin

193 A fast algorithm for two-dimensional pallet loading problems of large size
G. Young-Gun and M.-K. Kang

203 Greedy solutions of selection and ordering problems
B. Alidaee, G.A. Kochenberger and M.M. Amini

216 Behavioral and procedural consequences of structural variation in value trees
M. Pöyhönen, H. Vrolijk and R.P. Hämäläinen

229 Editorial: Financial modelling in the new millennium
J. Spronk and N. van der Wijst

PII: S0377-2217(01)00255-7

232 Allocative efficiency in branch banking
T.E. Hartman, J.E. Storbeck and P. Byrnes
243 A note on portfolio selection with restrictions on leverage
D.J. Bradfield and H. Raubenheimer
249 Option pricing bounds with standard risk aversion preferences
A. Basso and P. Pianca
261 From data to model and back to data: A bond portfolio management problem
J. Dupačová and M. Bertocchi
279 Scenario generation and stochastic programming models for asset liability management
R. Kouwenberg
293 Analyzing legal regulations in the Norwegian life insurance business using a multistage asset–liability management model
K. Høyland and S.W. Wallace
309 Age-based vs. stock level control policies for a perishable inventory system
E. Tekin, Ü. Gürler and E. Berk
330 Blackmailing the mayor: Using semi-formal state-based game theory methods to inform a security situation
J.H. Powell
346 An efficiency frontier approach for the design of cellular manufacturing systems in a lumpy demand environment
Y. Arzi, J. Bukchin and M. Masin
365 Capacity planning with congestion effects
S. Rajagopalan and H.-L. Yu
378 Data set generation for rectangular placement problems
P.Y. Wang and C.L. Valenzela
392 Overlapping design and build cycles in product development
A.K. Chakravarty
425 Protective capacity positioning: Impact on manufacturing cell performance
C.W. Craighead, J.W. Patterson and L.D. Fredendall
439 A multi-period network design problem for cellular telecommunication systems
P. Kubat and J.M. Smith
457 On generalized minimum spanning trees
C. Feremans, M. Labbé and G. Laporte
459 Models implementation: A state of the art
A. David
481 Linear and nonlinear dependence in Turkish equity returns and its consequences for financial risk management
R.D.F. Harris and C.C. Küçüközmen
493 A linear programming model dealing with ordinal ratings in policy capturing of performance appraisal
H.-W. Jung
498 Multivariate cointegration analysis of the Finnish–Japanese stock markets
R. Östermark
508 Managing the impact of high market growth and learning on knowledge worker productivity and service quality
E.G. Anderson Jr.

525 The infinite horizon non-stationary stochastic multi-echelon inventory problem and near-myopic policies
T. Iida
540 Approximations for the departure process of the G/G/1 queue with Markov-modulated arrivals
M.K. Girish and J.-Q. Hu
557 Extended methods for identifying dominance and potential optimality in multi-criteria analysis with imprecise information
K.S. Lee, K.S. Park, Y.S. Eum and K. Park
564 A compromise solution to mutual funds portfolio selection with transaction costs
Y. Xia, S. Wang and X. Deng
582 Optimal periodic development of a pollution generating tourism industry
A. Greiner, G. Feichtinger, J.L. Haunschmied, P.M. Kort and R.F. Hartl
592 Reducts within the variable precision rough sets model: A further investigation
M. Beynon
606 Sensitivity analysis of scheduling algorithms
B. Penz, C. Rapine and D. Trystram
616 Interactive stability of vector optimization problems
M.A. Kassem
623 Single machine scheduling with step-deteriorating processing times
T.C.E. Cheng and Q. Ding
631 Pricing non-storable perishable goods by using a purchase restriction with an application to airline fare pricing
M.Z.F. Li
648 Computation of a near-optimal service policy for a single-server queue with homogeneous jobs
S.G. Johansen and C. Larsen
664 Petri net-based modelling of workflow systems: An overview
K. Salimifard and M. Wright
677 Validation of simulation model for robotic milking barn design
I. Halachmi, A. Dzidic, J.H.M. Metz, L. Speelman, A.A. Dijkhuizen and J.P.C. Kleijnen
689 Contents Volume 134
